Art Unit 1713

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 2, 5 and 9 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Chuchin et al., U.S. Patent 4,104,244 taken in view of Avakian et al., U.S. Patent 6,214,915.

The Chuchin et al. patent is seen to show applicants' claimed stabilizer compound. The first compound of the Abstract as well as column 1 line 50 is seen to fall within the scope of the instantly claimed invention. This patent is extensive in the discussion of utilizing these compounds as stabilizers in vinyl polymers. The only difference between this patent and the instantly claimed invention is the express incorporation of the stabilizer in a polymer having butadiene monomers. The Examiner maintains that it would be prima facie obvious to utilize these stabilizers in these polymers given the art recognized functionality of these stabilizers and their use in the wide variety of vinyl polymers. The Avakian et al. patent is cited as

Art Unit 1713

showing very similar compounds which are in fact utilized in butadiene containing polymers. As such, one of ordinary skill in the art would have found it prima facie obvious to utilize the stabilizers as shown in Chuchin in the butadiene containing polymers as shown in Avakian et al.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6 and 10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Chuchin et al.

The rejection as set forth under 35 U.S.C. § 102 on pages 4 and 5 of Paper No. 5 is deemed proper and is herein repeated. Once again, the compound as shown at column 4 lines 5-10 is seen to anticipate applicants' instantly claimed stabilizer. The fact that these claims have the preamble language identifying the stabilizer to be used in a butadiene polymer does not render the claims patentable over this art. This is not seen to be a

Art Unit 1713

meaningful limitation and the compounds of the prior art are seen to function as stabilizers. As such, the claims are not novel.

**THIS ACTION IS MADE FINAL.** Applicants are reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a). The practice of automatically extending the shortened statutory period an additional month upon the filing of a timely first response to a final rejection has been discontinued by the Office. See 1021 TMOG 35.

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
